

CITET

Centro de Innovación
para la Logística
y el Transporte por Carretera

Who are we?

- **A non profit organization**
- **Founded as a Centre for Technological Innovation**
- **Oriented to Logistics and Road Transport**
- **Driven and promoted by the most important companies in the transport sector**
- **With the support of Official Authorities**

Our Vision

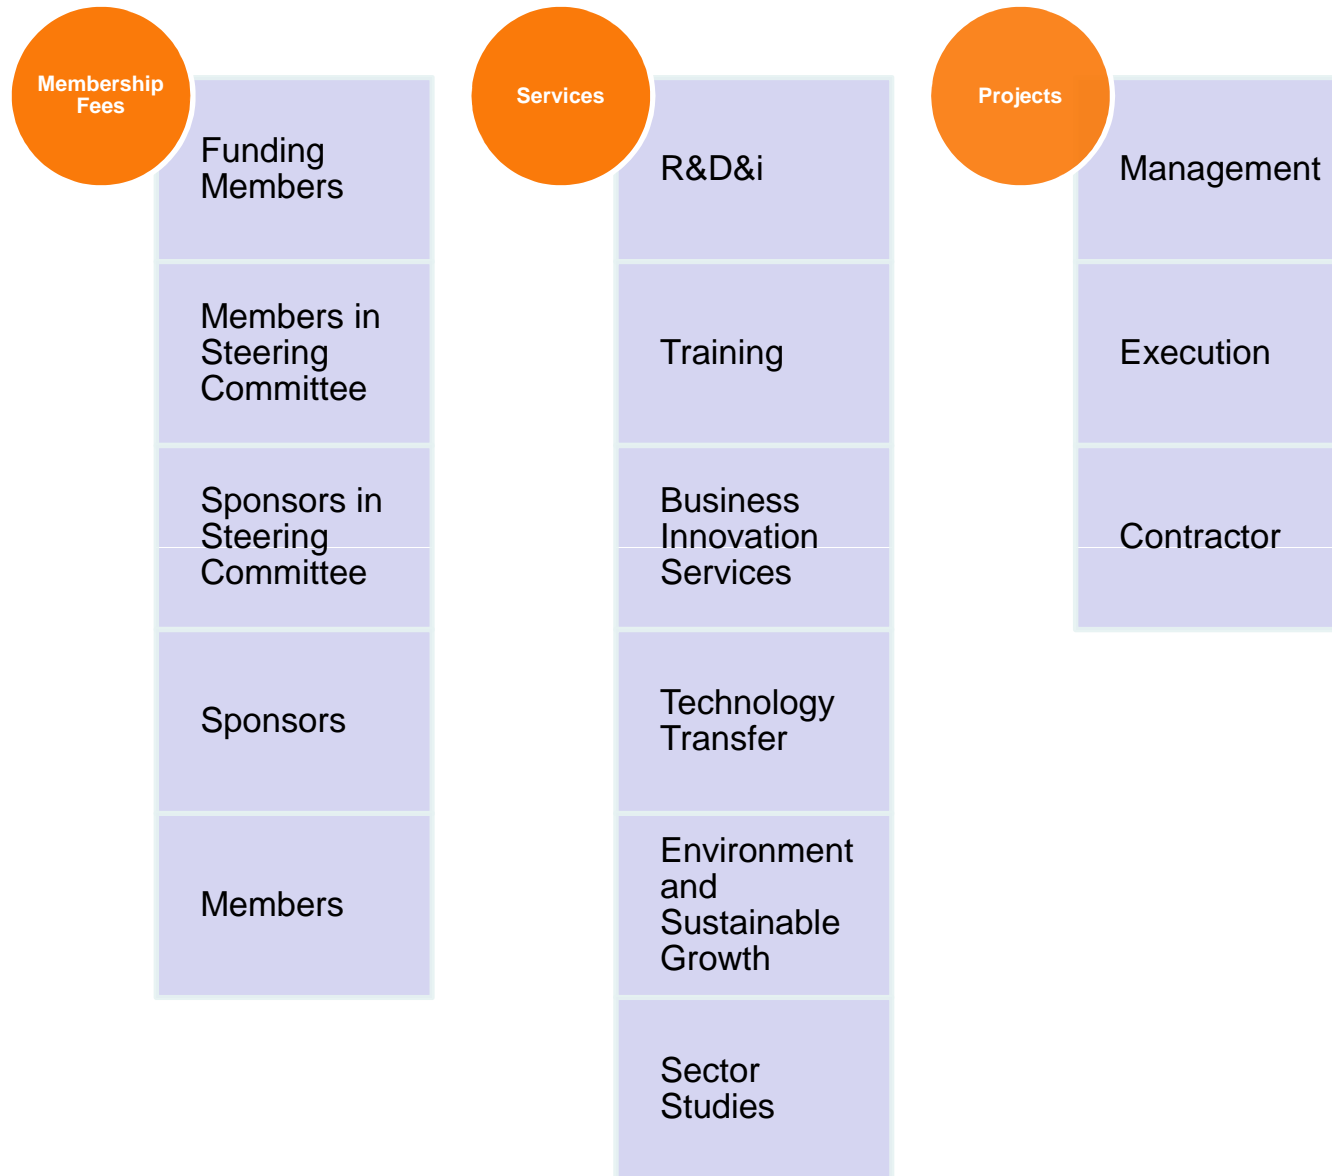

CITET will become an international reference technological centre for the sector of logistics and freight transport by road, providing human and technological tools to ensure sustained and sustainable growth of the industry

What we want to achieve

- Improve competitiveness and efficiency of the industry through:
 - The introduction of new technologies
 - Improvement on people training
- Assist Government agencies in their investment and policy making actions so that industry interests are taken under consideration
- Minimize the environmental impact of business activity
- Convert CITET in the reference point for industry know-how, particularly regarding the application of technologies and processes related to “last mile” distribution

Sources of income

Members of the Steering Committee

Desde 1980 impulsando la Logística

Dirección General de Transportes

Other members

Areas of application of our services

R & D & i

Training

Business Innovation Services

Technology Transfer

Environment and Sustainable Growth

Sector Studies

R & D & i (I)

Focus of the R&D&i activities

- Transport and Logistics
- Environment
- Safety and Security
- Warehousing
- Information Technology and Communication
- Training and Educational Technologies

Objectives of the area

- Develop research and technology innovation projects
- Develop lines of research to favour technology transfer

R & D & i (II)

Lines of action:

- Projects under specific Company requirements
- Projects in cooperation
- Projects to tackle sector needs
- Projects developed from Citet ideas

Training

Objectives

- Training the different actors in the field of L & T
- Build and improve the channels of exchange of technical and scientific knowledge among different stakeholders

Lines of action

- Graduate Programs
 - Master Programs
 - Doctorate Programs
- Training for professionals
- Studies and research focused on training
- Creation of the University Institute for Logistics and Road Goods Transport

Online training in cooperation with Bureau Veritas

- Basic Risk Prevention Course for Logistics Operators
- Basic Risk Prevention Course for Road Transport Companies
- International Trade Course
- Course for Security Advisors for handling hazardous goods
- Management Courses for Logistics Companies
- Quality Management Course in Logistics Services
- Warehouse Management Course
- Logistics and Transport Course
- Master in Logistics

Objectives

- To Support the improvement of competitiveness of companies in the sector of logistics and transportation of goods by road through the improvement of operational processes and management

Lines of action

- Transport and Logistics, Products and Facilities
- Advanced Technology
- Quality, Safety, Security and Environment
- Support R & D in companies

Technology Transfer

Objectives

- To be a platform of attraction for the latest technological advances, and a forum of communication within the sector
- To promote the use and transfer of technology in the sector
- To facilitate advanced technology services

Lines of action

- Communication of Technology
- Surveillance of Technology
- Transfer of Technology
- Technological observatory

Environment and Sustainable Growth

Objectives

- To contribute to the sustainable growth of the logistics and transport companies

Lines of action

- Studies on environmental impact
- Development of projects and initiatives
- Dissemination and communication
- Research and development of systems for environmental improvement
- Environmental Monitoring

Sector Studies

Objectives

- To represent the sector in certain forums and before institutions specially regarding technology matters
- To transmit an innovative, modern and competitive image of the sector
- To act as a prescription agent
- To promote good practices in the sector
- To promote business cooperation.
- To develop studies that concern the sector in general and the various partners in the association in particular.

Lines of action

- Dissemination and communication within the Sector
- Organization of Conferences, Seminars
- To perform sector studies
- Market Observatory
- To monitor market and sector trends

Our services

R & D

- Innovation Diagnosis and Audits
- Information related to grants and subsidies for R & D
- Identification of R & D projects
- Assist members in the process of application for public aids and tax issues
- R & D Project Management

Our services

Training

- Graduate Programs specialized in Transport and Logistics
- In company training
- Training in:
 - Health&Safety
 - Technology
 - Processes
 - Security

Our services

Innovation

- Technology assessment
- Consulting on processes

Our services

Technology Transfer

- Access to state of the art technologies
- Research on technology implementations in the sector
- Continuous communication with technology providers to promote new technologies into the sector
- Organization of conferences, seminars, and workshops

Environment and Sustainable Development

- Access to information on legislation and grants
- Actions to improve the image of the sector in terms of its environmental impact
- Projects to introduce improvements in environmental impact with participation of members

Our services

Sector Studies

- Development of best practice guides
- Studies in the sector
- Organization of events that facilitate cooperation among various players in the sector
